## Lamination and post treatments

Please note: the stated technical and environmental performance of a fabric may be affected by the post treatment applied. The technical parameters, including flammability, outlined in our internal specifications provide a guide to fabric performance and unless specified, are tested by Camira without a post treatment. We recommend that customers conduct their own testing on final finished components, including but not limited to flammability performance, in the intended format for end installation. Product guarantees for the post treatment of fabrics undertaken by Camira are guaranteed for 5 years.

All treatments - please allow a tolerance of +/-0.5m on <30m and +/-1m on >30m orders.

10 metre minimum order quantity per colourway, unless otherwise stated. Please allow 10 working days for all treatments.

We are unable to accept cancellation for orders where a post treatment has been requested. Please contact our Customer Services department for further information.
